

What is claimed is:

1. A method for communicating comments or corrections to a laboratory notebook, comprising:
 - a) placing a transparent sheet over a page of a laboratory notebook, the page containing written or printed information,
 - b) writing comments and/or corrections on the transparent sheet, and
 - c) returning the notebook, with the transparent sheet, to a person who prepared the notebook.
2. The method of Claim 1, wherein step (a) comprises affixing the transparent sheet to the notebook by an adhesive.
3. The method of Claim 1, further comprising removing the transparent sheet and making corrections in response to comments contained on the transparent sheet.
4. The method of Claim 2, wherein the adhesive is selected to be a repositionable adhesive.
5. A method for communicating comments or corrections to a document containing written or printed information, comprising:
 - a) placing a transparent sheet over a document containing written or printed information,
 - b) writing comments and/or corrections on the transparent sheet, and
 - c) returning the document, with the transparent sheet, to a person who prepared the document.
6. The method of Claim 5, wherein step (a) comprises affixing the transparent sheet to the document by an adhesive.
7. The method of Claim 5, further comprising removing the transparent sheet and making corrections in response to comments contained on the transparent sheet.

8. The method of Claim 6, wherein the adhesive is selected to be a repositionable adhesive.

9. A pad of transparent sheets, each sheet including an adhesive material disposed along at least part of a surface defined by the sheet, wherein each sheet in the pad is affixed to another sheet in the pad only by said adhesive material.

10. The pad of Claim 9, wherein each sheet is made of plastic.

11. A method of protecting and nondestructively annotating a document, comprising:

a) affixing a transparent sheet of material to a document, the document containing information, and

b) writing comments and/or corrections, relating to the information in the document, on the transparent sheet,

wherein said comments and/or corrections become superimposed on the information in the document.

12. The method of Claim 11, wherein step (a) is preceded by removing a transparent sheet from a pad of transparent sheets.

13. The method of Claim 11, further comprising lifting the transparent sheet from the document so as to view at least part of the document in an unaltered form, while allowing the sheet to remain affixed to the document.

14. The method of Claim 11, wherein step (a) is performed by adhesively attaching the transparent sheet to the document.

15. The method of Claim 11, wherein step (a) is preceded by selecting a size of the sheet such that the sheet substantially covers the document.

16. A method of nondestructively modifying a sign containing verbal information, comprising:

a) affixing a transparent sheet of material to the sign, and

b) placing additional verbal information on the transparent sheet, wherein the sign and the transparent sheet become superimposed, such that the verbal information on the transparent sheet modifies content of the sign without altering the sign.

17. The method of Claim 16, wherein the transparent sheet is obtained by removing the transparent sheet from a pad of transparent sheets.

18. The method of Claim 16, wherein step (a) is performed by adhesively attaching the transparent sheet to the surface.
